

P140 Pre-Printed Label Applicator

Applying pre-printed labels to your products is not a problem for the **P140 Pre-Printed Label Applicator**. Designed for high reliability within fast-moving 24/7 factories the P140 Applicator will apply rolls of labels up to 300mm diameter at speeds of up to 100 products per minute.

The P140 is a robust machine designed to apply labels simply and inexpensively. If you need to apply pre-printed labels to an accuracy of +/-5mm then why pay for more expensive machines with servo drives or stepper motors that give you more accuracy than you need? We use a proven dc motor that gives low cost label application without the expensive feedback or control mechanisms associated with more complex drive systems.

A simple design means less components to go wrong and greater reliability on your lines. From the same family as the well-proven P100 Print and Apply you can rest assured that the P140 will keep your lines running at peak efficiency.

Predominantly manufactured from aluminium and stainless steel and easy to wipe down, it is ideal for high-hygiene sites such as pharmaceutical or food plants.

High reliability, easy setup and modular components ensure that you get the most out of the P140 with minimal intervention.

The Codeology philosophy is to provide the right machinery for the job, which is why we design and build all of our systems including the ancillary components. This means we can provide you with a system that is designed to work together and is therefore totally reliable.

With over 40 man years experience of supplying labelling solutions for the retail supply chain combined with an acclaimed design we believe you won't find a better value for money or more reliable applicator on the market.

Call us today to try the P140 on your production line.

Features

- 300mm label roll capability to maximise throughput and minimise changeover frequency.
- High speed with up to 100 50 x 25mm labels applied per minute.
- Top or side labelling.
- Variable reach peeler plate with easy variation to allow fast change over for different product sizes.
- Peeler plate and motor assembly can be rotated to allow easy access into existing machinery or hard to reach places.
- Pneumatic round-the-corner label application option – no moving parts.
- Easy-to-use control panel - only two parameters to change.
- Integral alarm beacon visible from any direction to alert operators when label rolls need changing.
- Simple display to keep the operators informed of machine status.
- Narrow footprint minimises the impact on your walkways and floor space. The side labeller protrudes only 300mm into your walkway, the top labeller only 130mm.
- Simple height adjustments with counterbalance gas strut to allow easy and accurate label placement.
- Stainless Steel and Anodised Aluminium construction as standard.
- Modular construction means all major components can be exchanged in less than 30 minutes.
- Polymer bearings throughout giving superb performance in humid, chilled or damp environments and long trouble-free life.

What else can Codeology offer?

Codeology offer a full range of outer-case labelling solutions including full on-line print and apply, blank and pre-printed labels, ribbons, pallet labelling systems, barcode verifications systems and software. We also manufacture a range of outer-case ink jet carton coders for when you do not need barcodes.
