

P110 Outer Case Pre-Printed Label Applicator

Applying pre-printed labels to your products is not a problem for the **P110 Pre-Printed Label Applicator**. Designed for high reliability within fast-moving 24/7 factories the P110 Applicator will apply rolls of labels up to 300mm diameter at speeds of up to 50 products per minute.

Predominantly manufactured from aluminium and stainless steel and easy to wipe down, it is ideal for high-hygiene sites such as pharmaceutical or food plants.

From the same family as the well-proven P100 Print and Apply you can rest assured that the P110 will keep your lines running at peak efficiency.

High reliability, easy setup and modular components ensure that you get the most out of the P110 with minimal intervention. It can also easily be upgraded to a full print and apply system by adding a print engine.

The Codeology philosophy is to provide the right machinery for the job, which is why we design and build all of our systems including the ancillary components. We even designed the optional integral conveyor to ensure it met our high standards meant we could provide you with a system that is totally reliable.

With over 40 man years experience of supplying labelling solutions for the retail supply chain combined with an acclaimed design we believe you won't find a better value for money or more reliable applicator on the market.

Call us today to try the P110 on your production line

Features

- 300mm label roll capability to maximise throughput and minimise changeover frequency.
- High speed with up to 50 100 x 150mm labels applied per minute.
- Single side or side-and-end labelling.
- Variable reach peeler plate with easy variation to allow fast change over for different carton sizes.
- Peeler plate and motor assembly can be rotated to allow easy access into existing machinery or hard to reach places.
- Easy-to-use control panel - only two parameters to change.
- Integral alarm beacon visible from any direction to alert operators when label rolls need changing.
- Simple display to keep the operators informed of machine status.
- Narrow footprint of only 355mm from conveyor minimises the impact on your walkways and floor space. We can also offer an integrated applicator and case taper to minimise the overall line length required.
 - Simple height adjustments with counterbalance gas strut to allow easy and accurate label placement.
 - Stainless Steel and Anodised Aluminium construction as standard.
 - Modular construction means all major components can be exchanged in less than 30 minutes.

Options include integral conveyors, barcode scanners and barcode verifiers.

We are also very competitive for all of your pre-printed label requirements, contact us for pricing.
