Core sizes and roll diameters available to suit most applications

Call us today to try out our service

With over 40 man years experience of supplying labelling solutions for the retail supply chain, we believe we can supply the solution no matter what your needs.

What else can Codeology offer?

If you are still applying labels by hand then consider the Codeology P110 label applicator. Designed for high reliability within fast-moving 24/7 factories the P110 Applicator will apply rolls of labels up to 300mm diameter at speeds of up to 50 products per minute. If you have a dedicated person hand applying labels then the P110 can pay for itself within as little as 3 months. Call us to try one on your production lines.

Codeology also manufacture a wide range of ink jet printers for coding and marking, including the i100 entry level system for the retail supply chain. We both sell and hire any of our machinery. In addition we manufacture print and apply labelling machines, bench top printers, ribbons and blank labels for the retail supply chain.
